

Job Posting

Job title	<i>Maintenance Technician</i>
Reports to	<i>Process Engineering Manager</i>

Job purpose

Maintain the day-to-day operations and to assume responsibility for maintaining and repairing the physical assets of the company. Implement required improvements, changes and suggest alternatives when applicable.

Qualifications

SKILLS are required to perform single, technical tasks with a potential need to upgrade skills in order to meet changing job conditions. Specific skills required to satisfactorily perform the functions of the job include: adhering to safety practices; trouble-shooting/problem-solving on prototype machinery; and preparing and maintaining accurate records. Specific skills are as follows but not limited to:

- Journeyman millwright/electrician or similar
- Good oral and written English communication skills
- Excellent mechanical skills
- Electrical skills
- Hydraulic skills
- Maintenance program skills
- Goal orientated and capable of completing projects on time.
- Able to work independently with minimal supervision in a fast paced environment.
- Positive and respectful work attitude.

KNOWLEDGE is required to perform basic math; read a variety of manuals, write documents following prescribed formats, and/or present information to others; and solve practical problems. Specific knowledge required to satisfactorily perform the functions of the job includes: strong knowledge of mechanical systems, maintenance practices and some electrical; health standards and hazards; safety practices and procedures; pumps, motors, filters, heaters, and other equipment and machinery necessary to operate and to repair liner and cylinder production equipment, in addition to basic building maintenance.

ABILITY is required to schedule activities; gather and/or collate data; and use job-related equipment. Flexibility is required to work with others in a variety of circumstances; and operate equipment. Ability is also required to work with a wide diversity of individuals; work with specific, job-related data; and utilize a variety of job-related equipment. In working with others, problem solving is required to identify issues and create action plans. Problem solving with data frequently requires independent interpretation of guidelines. Specific abilities required to satisfactorily perform the functions of the job include: communicating with diverse groups; displaying mechanical aptitude; meeting deadlines and schedules; and working with frequent interruptions.

Working conditions

The job is performed with some temperature extremes and some hazardous conditions. Shift-work and overtime may be necessary.

Physical requirements

The usual and customary methods of performing the job's functions require the following physical demands: significant lifting, carrying, pushing, and/or pulling; frequent climbing and balancing; frequent stooping, kneeling, crouching, and/or crawling; and significant fine finger dexterity.
